#### Professional Experience

ABC COMPANY -- Sometown, NY

**Lead Programmer**, 2009 to Present

Develop, maintain and support application programs for administrative, Web and mobile systems using Java and related tools. Analyze code for system testing and debugging; create test transactions to find, isolate and rectify issues; and manage a team of three programmers.

#### Accomplishments:

- Reconfigured multiple systems to fuel improvements to productivity, efficiency, uptime and accuracy for global business operations. Developed code, system design and test/QA plans for all solutions and coordinated worldwide rollouts.
- Led, architected and participated in the design, testing and deployment of client/server, multitier applications, ActiveX and related components.
- Developed new procedures for requirements gathering, needs analysis, testing, scripting and documentation to strengthen quality and functionality of business-critical applications.
- Developed large-scale, portable, thread-safe and ultra-high performance foundation and application infrastructure libraries.
- Trained and mentored junior programmers in programming methodologies and best practices.
- Delivered back-office tools supporting ecommerce initiatives, enabling company to compete more effectively in the marketplace.
- Served as a core group member in defining and prioritizing technology investments for the next two years, ensuring the alignment of process, technology and business objectives.
- Conceptualized, planned, launched and currently chair the Cybersecurity Committee, a company-wide group focused on improving security of the business' information infrastructure.
